<b>About</b>	1
<b>Chapter 1: Getting started with MongoDB</b>	2
<a href="#">Section 1.1: Execution of a JavaScript file in MongoDB</a>	2
<a href="#">Section 1.2: Making the output of find readable in shell</a>	2
<a href="#">Section 1.3: Complementary Terms</a>	3
<a href="#">Section 1.4: Installation</a>	3
<a href="#">Section 1.5: Basic commands on mongo shell</a>	6
<a href="#">Section 1.6: Hello World</a>	6
<b>Chapter 2: CRUD Operation</b>	7
<a href="#">Section 2.1: Create</a>	7
<a href="#">Section 2.2: Update</a>	7
<a href="#">Section 2.3: Delete</a>	8
<a href="#">Section 2.4: Read</a>	8
<a href="#">Section 2.5: Update of embedded documents</a>	9
<a href="#">Section 2.6: More update operators</a>	10
<a href="#">Section 2.7: "multi" Parameter while updating multiple documents</a>	10
<b>Chapter 3: Getting database information</b>	11
<a href="#">Section 3.1: List all collections in database</a>	11
<a href="#">Section 3.2: List all databases</a>	11
<b>Chapter 4: Querying for Data (Getting Started)</b>	12
<a href="#">Section 4.1: Find()</a>	12
<a href="#">Section 4.2: FindOne()</a>	12
<a href="#">Section 4.3: limit, skip, sort and count the results of the find() method</a>	12
<a href="#">Section 4.4: Query Document - Using AND, OR and IN Conditions</a>	14
<a href="#">Section 4.5: find() method with Projection</a>	16
<a href="#">Section 4.6: Find() method with Projection</a>	16
<b>Chapter 5: Update Operators</b>	18
<a href="#">Section 5.1: \$set operator to update specified field(s) in document(s)</a>	18
<b>Chapter 6: Upserts and Inserts</b>	20
<a href="#">Section 6.1: Insert a document</a>	20
<b>Chapter 7: Collections</b>	21
<a href="#">Section 7.1: Create a Collection</a>	21
<a href="#">Section 7.2: Drop Collection</a>	22
<b>Chapter 8: Aggregation</b>	23
<a href="#">Section 8.1: Count</a>	23
<a href="#">Section 8.2: Sum</a>	23
<a href="#">Section 8.3: Average</a>	24
<a href="#">Section 8.4: Operations with arrays</a>	25
<a href="#">Section 8.5: Aggregate query examples useful for work and learning</a>	25
<a href="#">Section 8.6: Match</a>	29
<a href="#">Section 8.7: Get sample data</a>	30
<a href="#">Section 8.8: Remove docs that have a duplicate field in a collection (dedupe)</a>	30
<a href="#">Section 8.9: Left Outer Join with aggregation ( \$Lookup)</a>	30
<a href="#">Section 8.10: Server Aggregation</a>	31
<a href="#">Section 8.11: Aggregation in a Server Method</a>	31
<a href="#">Section 8.12: Java and Spring example</a>	32
